CYBER SECURITY TECHNOLOGIST

Managing and dealing with cyber threats, hazards and risks to protect organisations, systems and people from harm.

> **Duration**
Typically 24 months

> **Route**
Digital

THE ROLE

The primary role of a Cyber Security Technologist is to apply an understanding of cyber threats, hazards, risks, controls, measures and mitigations to protect organisations systems and people. Those focused on the technical side work on areas such as security design & architecture, security testing, investigations & response. Those focussed on the risk analysis side focus on areas such as operations, risk, governance & compliance.
