DATA ANALYST

Collect, organise and study data to provide business insight.

> **Duration**

Typically 24 months

> **Route**

Business and administration

THE ROLE

.....

The role of a Data Analyst is to collect, organise and study data. They are typically involved with managing, cleansing, abstracting, aggregating data, and conducting a range of analytical studies on that data. They also document and report the results of data analysis activities making recommendations as to how to improve business performance. They require a good understanding of data structures, database systems and procedures used to undertake a range of different types of analysis.
