SOFTWARE DEVELOPER

Building and testing simple, high-quality code for software.

> **Duration**

Typically 24 months

> **Route**

Digital

THE ROLE

The primary role of a software developer is to build and test simple, high-quality code across front end, logic and database layers. A developer will typically be working as part of a larger team, in which they will have responsibility for some of the straightforward elements of the overall project. The developer will need to be able to interpret design documentation and specifications.
